PROFILE

My journey as a Fullstack Developer began during my time at COSAT High School, where I was first introduced to the basics of computers and technology. From the moment I learned how to interact with code, I became fascinated with how the web works and how technology can be used to solve real-world problems. What started as a simple curiosity quickly turned into a deep passion for coding and web development, which led me to pursue a career as a Fullstack Developer.

I have since built a strong foundation in both front-end and back-end development. This dual expertise allows me to create seamless, user-friendly interfaces while ensuring the functionality and scalability of the backend systems. I specialize in designing and developing web applications that are efficient, robust, and easy to use, with a focus on delivering excellent user experiences across all devices.

WORK EXPERIENCE

Life Choices Studio   2024 - PRESENT

As an intern at Life Choices Studio, I am gaining hands-on experience in a dynamic, real-world environment where I am continuously upskilling and tackling new challenges. My role involves working on a variety of projects, which allows me to apply my knowledge of multiple programming languages and development frameworks to build robust, responsive applications.

I have had the opportunity to work with a diverse tech stack, which includes:

- Frontend Development:
  - HTML, CSS, JavaScript: Crafting clean, responsive, and visually appealing web pages, ensuring an optimal user experience across all devices.
  - Vue.js: Building interactive and dynamic user interfaces with Vue.js, creating efficient state management, and implementing responsive layouts.
  - Bootstrap: Utilizing Bootstrap for rapid front-end development, ensuring consistent styling and responsive design.
- Backend Development:
  - Node.js: Writing server-side logic and building RESTful APIs using Node.js, handling user authentication, data management, and business logic.
  - Express.js: Leveraging the Express framework to create scalable server-side applications and manage HTTP requests.
  - MySQL: Designing and managing databases, creating queries, and performing CRUD operations to ensure seamless data interaction between the front-end and back-end.

EDUCATION

Bachelor of Arts (Psychology)   2021- 2024
Nelson Mandela University

BACHELOR PASS (NSC)   2016- 2020
Centre of Science and Technology (COSAT)

CERTIFICATES

AWS CERTIFICATES
